150g ZVP-4163 Herbal mix

FOR CHINCHILLAS AND DEGUS

150g ZVP-4102 Herbal mix

The Vita Herbal line includes snacks prepared on the basis of ingredients derived directly from nature. Due to the high content of dried vegetables, they are adored by rodents. Full of vitamins and nutrients, they not only diversify the daily diet, but also have a positive effect on the body and regulate digestive processes.

BOWLS VITA HERBAL

are an original form of giving treats to all rodents and rabbits. The wooden bowl, after emptying the mix, can still be used as a bowl for regular food, which the pet can safely nibble on and at the same time grind down its incisors.

ZVP-1005

EUROPEAN HAY

800g ZVP-1041

Vitamins are a necessary element to supplement the diet of small like fur animals. Many mammals' systems have the ability to synthesize vitamin C by themselves, a rat, a hamster or a rabbit, unlike the organism of a guinea pig which does not have this ability, so it is important to supplement its diet with vitamin C. Kokcivit forte is a set of herbal extracts containing a high dose of salicylate, which has an anti-inflammatory effect.

Activin contains all organic acids necessary for rodents and rabbits as well as micro and macro elements. It reduces the risk of intestinal infections. It can be administered for digestive problems.

Vitapol®

Vita Herbal

MIX WITH HAY
CREATE YOUR OWN
DELICIOUS AND HEALTHY
COMPOSITIONS

Aromatic, carefully dried grass blades collected from Polish meadows are valuable food for herbivores. Hay is a low-calorie food, with a high content of raw fiber, which positively affects the digestive processes. The addition of natural meadow herbs has a soothing effect on the digestive system.

PRODUCTS OF THE EXPERT LINE ARE PREMIUM COMPLETE PET FOODS, ADAPTED TO THE NUTRITIONAL REQUIREMENTS OF PARTICULAR SPECIES OF PETS.

The basis of the mixtures are natural raw materials, containing all the necessary nutrients as well as **vitamins and minerals** supporting pets health. Properly balanced, the line is distinguished by a high fiber content in products intended for herbivorous animals and proper protein content in products for omnivorous rodents. The recipe of the **EXPERT** line is based on extruded ingredients with high digestibility and absorption. Complemented with dried vegetables and fruits, rich in natural vitamins and minerals, the line is eagerly consumed by animals.

Magic Line

The palette of various ingredients is what distinguishes Magic Line products - High Premium quality mixes. Easy to digest and very nutritious, rich in natural fiber, vitamins and minerals, the food regulates the work of rodents and rabbits digestive systems. A properly balanced line contains a large amount of dried vegetables and fruit, strengthening the immune system of animals. **The advantage of extruded ingredients is that Magic Line foods are eaten completely, even by the most demanding and picky rodents.**

Magic Line contains not only complete food, but also Smakers with icing.

Snacks are recommended to enrich the daily diet of animals. The mass does not stick to rodent's teeth, and the high calcium content strengthens the bones. In this line you will also find Smakers with tree bark, which supports hygiene and maintains the correct length of rodent and rabbit incisors.

HIGHEST QUALITY

Premium is a line of the highest quality products, recommended for daily consumption for rodents, rabbits and ferrets. Carefully selected ingredients of great variety contain everything that the animal needs for healthy and proper development. Tasty and easily digestible, with a lot of dried vegetables and fruits. The reduced content of oil seeds and fruits means that Premium line foods comprehensively meet the animal's demand for nutrients, without overstraining the digestive system.

Premium products line contains also nutritious Smakers, which can be an alternative method of feeding. The unique Premium Smakers are complete foods. The attractive form of Smakers placed in the animal's cage stimulates active feeding and self-rationing.

COMPLETE FOODS ADAPTED TO DAILY NEEDS

Proper nutrition of rodents and rabbits is the key to their healthy, proper development. The main argument for choosing particular feed should always be the composition which will provide the nutrients necessary for the proper functioning of the body. VITAPOL complete pet foods are an excellent base, distinguished by high digestibility, which can easily be enriched with natural additions: fresh fruits and vegetables.

EXCELLENT SUPPLEMENTATION OF A DAILY DIET

Smakers are snacks having compositions prepared individually for each species of rodents and rabbits. Prepared exclusively from natural components, not only do they supplement the pets' daily diet with necessary nutrients, but they also take care of their teeth and arouse its natural drive for active finding of food. Smakers have the form of a convenient cob, available in a variety of flavors and tastes, preferred by pets. Mounted on a special hanger, they fit each type of the cage.

Bedding

HEALTH, SAFETY AND COMFORT

Bedding is one of the most important additions to any rodent or rabbit cage. Hay, sawdust or sand, what to choose? Before making the final decision, it is worth getting to know the animal's way of life and environment. The best bedding is the one that will provide comfort and a sense of security. Bedding absorbs moisture and eliminates odors, thanks to which a pleasant smell spreads in and around the cage.

HIGH QUALITY AT GOOD PRICE

ECONOMIC line foods are high quality products at an attractive price that we have developed for domestic rodents and rabbits. All this to meet their daily nutritional needs fully. How do **ECONOMIC** products work? First of all, they provide the animal with the right amount of energy, comprehensively meet its daily demand for nutrients and effectively regulate digestive processes. Thanks to their convenient packaging with a tight seal, they are easy to store and stay fresh for a long time.

Our **ECONOMIC** feed is also available in the form of a healthy and tasty snack - Smakers. This convenient treat stick made of cereals, seeds and vegetables hung in a pet's cage stimulates them to naturally and actively obtain food.

KARMEO PREMIUM COMPLETE FOOD ADAPTED TO DAILY NEEDS

Birds, like other animals, need varied food, rich in vitamins and minerals. The basis of their diet should be a varied grain mix, however limiting the diet to only grains can cause excessive appetite, which does not always go hand in hand with meeting their nutritional needs. Complete and complementary feeds as well as Smakers by VITAPOL will provide every budgie, cockatiel, zebra finch or lovebird with a perfectly balanced diet.

EXCELLENT ADDITION TO THE DAILY DIET

Smakers contain the highest quality ingredients in carefully picked proportions. These are snacks with exceptional flavors and nutritional values, designed for ornamental birds and parrots. The form of Smakers stimulates the natural eating habits of birds in the wild. The structure of the snack consists of three layers: a base made of millet grains, a nutritious wheat layer and an individually developed external mix. The size of the Smakers is selected according to the size of individual bird species and their eating capabilities.

HIGH QUALITY AT GOOD PRICE

ECONOMIC is a line of complete foods, tailored to the individual needs of different species of ornamental birds and parrots. Rich in nutrients, enriched with granules with anise scent, it is recommended as a core of the daily menu. The packaging with the possibility of closing allows the product to remain fresh for a long time. The line is distinguished by a variety of ingredients with a different texture and shape that stimulate active eating by the bird.

ECONOMIC feeds are high quality products available at the lowest price.

Vitapol

SandEo

Sands for birds

in bucket (5,4 kg):

with anise ZVP-2061
lemon-flavored ZVP-2072
with shells ZVP-2082

in packet (1,5 kg):

with anise ZVP-2051
lemon-flavored ZVP-2071
with shells ZVP-2081
orange-flavored ZVP-2091

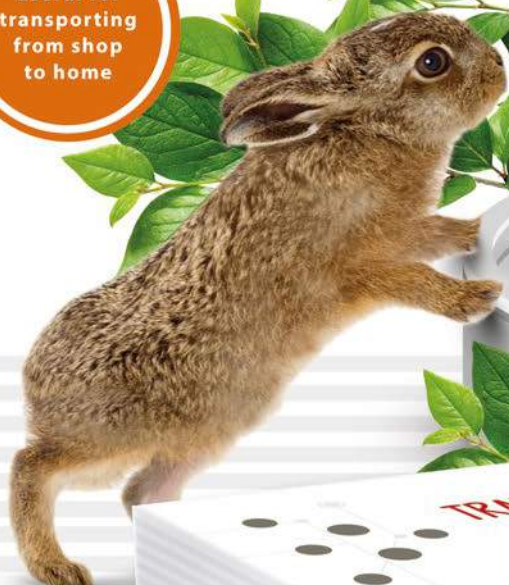

Cleanliness and hygiene in the cage

Vitapol sands for birds allow you to maintain cleanliness and hygiene in the cage. The heat treatment in 100°C ensures sterility. Thanks to the addition of crushed shells, the sands provide calcium of natural origin. Free of impurities, enriched with anise, they eliminate parasites that can be dangerous to bird's health. Fragranced versions are also available, providing pleasant citrus scent in a cage.

10 KG ZVP-5032

The basic benchmark for proper cat nutrition is the adaptation of their diet to age, lifestyle and breed. As the organism develops, the need for calories and nutrients changes. VITAPOL feeds comprehensively meet all nutritional requirements, provide essential ingredients and microelements, not only to cats that lead a calm lifestyle, but also to those that are very active. Especially for cats that do not have the opportunity to supplement their diet with plants, cat grass has been prepared. Easy to maintain, the grass supports the functioning of the digestive system, at the same time eliminating the formation of hair balls.
